

FOR IMMEDIATE RELEASE:

Heatcon Demonstrates Complex Composite Repair Capability at SAMPE 18

SEATTLE, WA, May 14th, 2018 – HEATCON

Composite Systems, a leading global manufacturer and supplier of aerospace composite repair equipment, announces that it will exhibit next week at the SAMPE conference May 21-24 in Long Beach, CA at booth # H35. SAMPE 2018 is a full-scale technical conference and exhibition featuring the latest technologies and research advancements concerning the advanced materials and processes community.

This year, Heatcon, a SAMPE North America Silver Corporate Partner, is excited to demonstrate its [Dual Zone Hot Bonder](#), [Touch Screen Hot Bonder](#), [Electric Vacuum Pump](#), [Thermocouple \(TC\) Expansion Unit](#), and [Heat Blankets](#) – including a [Radome Heat Blanket](#). Heatcon products are used around the world by OEMs, operators, and maintenance organizations. Visitors to the booth will have the opportunity to experience the products firsthand through a product demonstration and to speak with the sales engineering team.

Heatcon also supports the advancement of student education and learning via its involvement in the [SAMPE Student Bridge Contest](#), wherein a team of engineering students design, construct, and test a small-scale functional bridge using composite materials. Heatcon is proud to donate prepreg fiberglass materials to this cause.
